MANAGER'S COMMENTS

The KLCI dropped 1.8% MoM to close at 1,649 in September, primarily due to selling pressure in the Energy, Technology, and Telecommunications sectors. Market breadth was heavily negative, reflecting broad-based profit-taking. The Energy sector faced a sell-off after reports that Petronas is considering legal action against the Sarawak state government, as Petros seeks greater control over oil and gas assets. Meanwhile, the Technology sector continued to decline, with a stronger ringgit leading to near-term profit compression.

However, the month saw sectoral gains in Healthcare, Construction, and Property. Healthcare stocks rose on the back of higher tariffs imposed on Chinese medical glove producers, while the Construction and Property sectors benefitted from bargain-hunting activities. Despite the broader market decline, the IDEF fund outperformed the key index, driven largely by significant share price appreciation in banking, REITs, and Consumer stocks.
